

BIOELASTOMERS

General Properties

Bioelastomers commercialized by Natureplast are elastomers that can be 100 % biodegradable and compostable in agreement with standards in use (EN 13432) and are partially biobased.

Those bioelastomers can be processed mainly on injection molding standard equipments, and are meant for applications needing flexibility and good mechanical properties.

NaturePlast

The natural evolution of plastic

Applications

Processing: injection molding.

Markets: thermoplastic elastomers ...

Properties

- High flexibility.
- Good mechanical properties.

Grade	Biobased	Biodegradable	Density	Shore Hardness	Tear strength (kN/m)	Tensile Modulus at 100 % elongation (MPa)	Tensile Modulus at 300 % elongation (MPa)	Elongation at break (%)	Abrasion loss (mm ³)
ISO			1183	868	34-1B	527	527	527	4649
