

# ADDITIVES

## General Properties

NaturePlast proposes worldwide sourced additives to improve bioplastics processability on conventional equipments and finished products properties.

We present here a non exhaustive list of additives we can distribute.

Those can be in the form of powder, granules or masterbatches depending on references.

# NaturePlast

The natural evolution of plastic

## Applications

- Bioplastic properties improvement
- Processability improvement

### Properties improvement

Impact strength and flexibility

Brightener

UV barrier

Anti-fog

Antistatic

...

### Processability improvement

Demolding agent

Slip additive

Mixing properties

Fluidity improver

...
